

Smart Door Lock with Key, Swipe Card and Remote

New door entry product that offers security, comfort and special purpose access to all users. Lock and be used with a key, swipe card and radio remote control. All three levels of entry are designed with maximum security in mind. Three keys come with the product. These keys are specially made so no duplication can be made. The swipe card is the size of a credit card. It has 128 bit encryption which is at the maximum level of security. The radio frequency remote control can work up to 50 meters in open space and around 20 meters in closed space. It does frequency hopping as would any car remote control. Operates on the same principle as the car remote.

Features

- Electrical and mechanical integration -- Long service life. --
- Controlled by electricity, open very quickly. -- Use rechargeable Li battery, no need to change battery. --Can be set into the unlocked function for heavy traffic area. ---Remote controller optional.---
