

Disclaimer

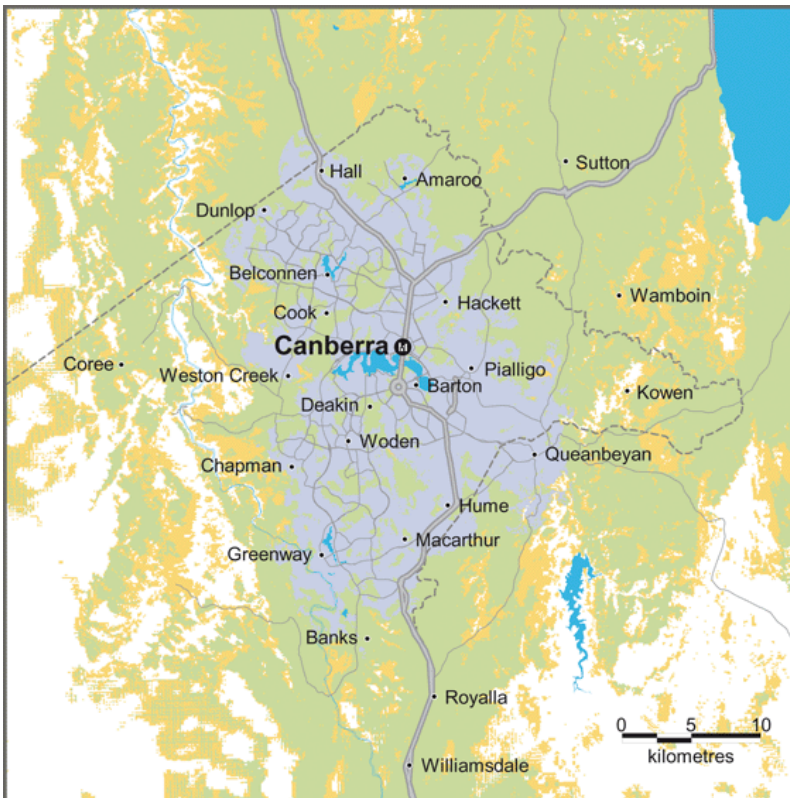

Important: While the highest standards have been applied in preparing these maps, 100% mapping accuracy cannot be guaranteed. In addition, coverage information is based on outdoor analysis and may differ when indoors. There may also be a number of factors beyond Vodafone's reasonable control that could cause coverage to vary within a stated area. For example, the age and type of handset, local weather conditions or areas of variable reception (e.g. basements, lifts, underground car parks, large concrete buildings, tunnels or road cuttings) may mean reception is unavailable or subject to interruption. Current as of March 2006.
